High Retention System

Whatever your key sanitation needs – CIP, COP, minimizing cross contamination – the superior sanitation of HRS™ foam additive controls bacterial breeding grounds

HRS foam additive extends contact time and provides high visibility coverage to enhance the disinfecting capabilities of VigorOx® liquid sanitizer

HRS foam additive adheres to any plant surface, including the undersides of conveyer belts, refrigerator coils and hard-to-reach cracks and crevices

There's still time!

Get the facts on fighting bacteria

You take sanitation seriously. So do we.

That's why we've extended our deadline to April 30, 2004 to offer you a **FREE Innovative Plant Sanitation information kit**, which contains the latest technical information and case studies on fighting microbes. It's a valuable reference tool for any professional who's committed to food safety.

Get the latest news on plant sanitation

Our Innovative Plant Sanitation information kit gives you an expert look at a costly problem: food processing contamination. Now there's a new tool for preventing shutdowns: VigorOx® liquid sanitizer with HRS™ foam additive. It's the only system that combines disinfecting peracetic acid with thick, stable, surface-covering foam to control *Listeria*, *E. coli*, *Salmonella* and other microbials.

HRS gives you better results for less

VigorOx liquid sanitizer with HRS foam additive clings to surfaces longer to provide better coverage with less product than standard sanitizers and disinfectants. And HRS foam additive reaches into cracks, crevices and hard-to-reach equipment areas to ensure complete sanitizing and minimize downtime.

Request your free kit!

Deadline extended to April 30, 2004

There are three easy ways to request your no-obligation Innovative Plant Sanitation information kit:

- Return the enclosed postage-paid reply card by April 30, 2004
- Call us at 1-800-948-6645, or
- Visit our website at www.hrsfoam.com
